## **DETAILED ACTION**

### ***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

2. I. Claims 1 – 22, 25 and 26, drawn to switch assembly, classified in class 200, subclass 524.

II. Claims 23 and 24, drawn to a display apparatus with a plurality of solid state light sources, classified in class 362, subclass 226.

The inventions are distinct, each from the other because of the following reasons:

3. Inventions Group I and Group II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention of Group I has separate utility such as switch actuating mechanism that can be used in any breakers or interrupters and Group II has separate utility such as a display apparatus that can be used with electronic microswitches. See MPEP § 806.05(d).

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

5. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

Art Unit: 2832

6. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

7. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
